

Scrum Master (m/f/n)

Freelance-ID: OCR-FL-2775

The services shall be provided within the Scrum framework. An Analytical Method Execution System (AMES) providing ELN (Electronic Laboratory Notebook) + MEx (Method Execution) functionality based on LabWare MyLIMS will be implemented within this project.

Tasks:

- Coaching and consulting product team members to understand and practice Scrum way of working. This includes scheduling and planning of On-Site Workshops and 1:1 meetings with the team members
- Facilitate different scrum ceremonies and ad hoc meeting
- Resolve conflict effectively within the product team to ensure an environment of high productivity
- Guide product owner with the backlog prioritization and coach him on agile
- Guide the team to continuously inspect and adapt its processes for improvement by using suitable agile metrics that are aligned with the product vision and goals
- Communicate updates regarding the product status transparently to the stakeholders
- Using Atlassian tools (Jira, Confluence) for documentation of meeting outcomes, planning, or other sorts of documentation (user documentation, user stories, process overview, impediments, product documentation, team metrics)
